BILL CLINTON ON THE ISSUES

Dear Fellow American:

Our country is in trouble. We're falling behind economically, and drifting apart with no sense of common purpose or common good. Our people are really hurting. For ten years, the middle class has declined, poverty has exploded, and only the rich are doing better.

When he isn't denying that an economic crisis exists, the President blames Congress for our problems. Then the Congress blames him back. It's time someone took responsibility to change things.

I am running for President with a specific plan for economic change --- a plan to jumpstart our economy in the short term and a new long-term strategy to turn our country's economy around and restore the American Dream for all.

This plan includes a tax cut for the middle class and asks the rich to pay their fair share. It calls for health insurance for every American and a public and private investment strategy to create new jobs. And it calls for a revolution in government to provide more choices and more services with less bureaucracy.

This is more than a campaign. It's a crusade for change...a crusade to restore the American Dream for the forgotten middle class and build a better life for our children.

If you believe America and Florida can compete and win again, I'm your candidate, and I need your support. Together, we can take our country back!

Sincerely,

Bill Clinton

CUT TAXES FOR THE MIDDLE CLASS

Congress should pass a 10% middle class income tax cut.

EXPAND THE CHILDREN'S TAX CREDIT

I propose a tax credit of up to \$800 per child to ease the burden on working families.

ECONOMIC LIFELINE FOR THOSE IN NEED

This lifeline would enable middle class families to make health insurance premiums and monthly mortgage or rent payments.

JUMPSTART ECONOMIC DEMAND

Accelerate highway spending. Expand home loans. Lower interest rates.

QUALITY HEALTH CARE FOR EVERY AMERICAN

In the first year of the Clinton Administration, we will offer a plan to deliver quality, affordable health care to all Americans. I pledge to: Control Costs, guarantee universal coverage, improve preventive care, provide long term care and more choices.

OPPORTUNITY FOR ALL

I will expand the Earned Income Tax Credit so that working poor can take home and keep a larger portion of their income.

THE MIDDLE EAST

I believe the President is wrong to use public pressure tactics against Israel. We need a broader policy toward the Middle East that seeks to limit the flow of arms into the region; promote democracy and human rights; and preserve our strategic relationship with the one democracy in the region: Israel.

EDUCATION: EMPOWERING OUR PEOPLE

Education is economic development. Empowering everybody begins with preschool for every child who needs it and fully funding Head Start. I'll ask Congress to establish a trust fund out of which every American can borrow money for college so long as they pay it back or give two years of national service.

Dear Floridian:

I need your help! A victory in Florida on Super Tuesday, March 10th is critical. Please fill out the form below and mail it to the Florida Headquarters. Your support and activism are greatly appreciated!

Sincerely,

Bill Clinton

"This country needs a new spirit... a new sense of community. A sense that we are all in this together. Our destiny is bound to the destiny of every other American, because we will rise or fall together. It is this generation's responsibility to form a new covenant for America: to provide opportunity for all; to demand responsibility from all; and to nurture a great sense of common purpose. Together, we can make America great again!" -- Bill Clinton
